Skills

I have a good understanding of the following.

Networking, *Python, NGINX, HTML, CSS, GIT, Bash, Kotlin, Java, Drupal, React*

I know how to configure the ip address of a computer/server on a network by assigning it either a static or dynamic ip address.

I know how some basic TCP/IP dependent protocols like ssh, telnet and other UDP dependent protocols function.

I lay down the network of a space with either of the network topologies used in networking.

I can assign IP address to different groups of computers in a setting to formulate subnets.

I also know Bash for scripting. I have a very good understanding of ***UNIX/ LINUX OS*** and I can do automation with ***Python and Bash***.

Fair knowledge in Android Apps with Kotlin language

I am good at using tools such as GIT/GitHub for collaborating on projects.

Other Skills

I am also a good communicator in both English and French. Hence, communicating with clients who speak either of the Languages would not be a problem.
